

**Hanford Occupational Medical Services
1979 Snyder Main Clinic
August 3rd, 2011**

As participants board busses, cross-check names and assure appropriate Badges.

Welcome aboard. You were all provided instructions when you signed up for this tour, but I want to confirm that no-one has any prohibited items? The list is included in the Briefing booklet you signed for in badging. Thank you.

Busses leave from Richland Federal Building

Welcome to Richland, we will be travelling first to the Occupational Medicine Main Clinic in Richland, Washington. After our tour of that location, we will continue onsite to the 200 West Area for a tour of the 200 West Area Health Care Center.

Busses arrive at main clinic

Please carefully disembark and we'll convene in the entrance lobby.

Tour Begins

Welcome to the Main Clinic for the current Hanford Occupational Medicine contract. Here are floor plans of this facility if you do not already have one. (handout)

Since both the Main Clinic and the 200 West Health Care Clinic we are touring today are in full operation, I request your full cooperation with the DOE guides to ensure protection of patient privacy and for your own safety.

The incumbent contractor leases this facility and is reimbursed by the Government. All equipment in this facility is government owned.

Let's begin by entering the lobby / patient reception area through these doors. This is where incoming patients report and fill out necessary paperwork.

SOUTH WING

Proceed south along testing room hallway

Down this hallway on the right are three testing rooms, each containing an EKG machine, a vision testing machine, and PFT machine.

Show at least one representative testing room

On the left are offices and cubicles.

The next room on the right is the Audio testing room. The audio testing booth has four seats.

Turn right at end of hallway

Across from X-ray, just to the right of the exit doors, is the Cardiac treatment room.

Moving west, the hallway ends at another testing room which also is equipped as an eye care room.

Backtracking – east along the southernmost hallway

The first door here on the left is the x-ray room. We have recently purchased and installed a new digital x-ray machine.

On the left we have the entry into the records room. Due to the sensitive nature of the medical record material, we are not going to enter the room, however we can look in from the doorway to understand layout of records storage of records on shelves and 4 workstations.

This next locked door on the left is a room set aside for the staging of medical records.

On the right are two offices.

Turn left down hallway (now headed north)

ON the right are various medical providers' offices. The first room on the left is an office. The next room on the left is a small conference room. The next room on the left is a room for collection of samples for drug screening. The next room on the left is a room for collection of blood samples. This last room on the left in this hallway is another office.

Turn left into hallway back towards lobby/patient reception area

On the right is another office and next to this are two restrooms for urine sample collection. On the left is another office and we return to the lobby patient reception area.

Cross lobby to enter west side of facility.

On the left is a large conference room. The remainder of this area consists of offices and cubicles.

View area

Return through lobby to building entrance lobby then continue on to north wing.

NORTH WING

Enter office area on left.

This area consists of more office space, a small meeting room, and a small luncheonette.

Return to hallway and move north to Behavioral Health Services

When Cleared, enter Behavioral Health Services

The first room on the left is more records storage. The remaining rooms are offices. This room on the right is a testing room.

Leave BHS, note Medical Inventory to right of BHS entry

This door enters Medical inventory which is storage for supplies etc.

Return to hallway and move north to work conditioning
Enter work conditioning on the left (west) side

This is the work conditioning area. Offices are located along the right. A couple of treadmill / cardio testing rooms are located along the left wall as well as a restroom facility.

Return to hallway and move directly across to east side

This area consists of additional offices and a conference room.

This concludes the tour of the Main Clinic for the current Hanford Occupational Medicine contract. Please take advantage of the restrooms if needed and we can reenter the bus for a 40 minute ride out to the 200 West Health Care center.

Board the busses. Cross check list of names if a large group. Ensure everyone has their badge.

At Wye barricade entrance to Hanford site

We are approaching the entrance to the Hanford site. You may need have your badges and picture ID ready to present if asked.

200 West Health Care center

Enter the lobby/reception area.

This is the 200 West Health Care center. This facility is owned by the government and facilities costs are reimbursed. All equipment in this facility is government owned.

Again, since the 200 West Health Care Clinic we are touring today is in full operation, I request your full cooperation with the DOE guides to ensure protection of patient privacy and for your own safety.

We will enter and regroup in the lobby when we get the clear signal.

Down this south hallway on the left is a storage room and then an eye care room. Across on the right side is a cardiac care room. Next to cardiac care on the right is a treatment room and then a restroom. Across from the restroom on the left is the audio testing room with a one-seat testing booth. Next to

audio is a room equipped for breath alcohol testing. Across from this is the final room on the right, a lab for blood and urine sample collection.

Return to the lobby and move north to the northern hallway

First room down this northern hallway on the left is a testing room similar to those seen at the main clinic; adjacent to this is an office/exam room. Across from this is the current X-Ray room. Although a new digital x-ray machine has been purchased, the installation will not be completed until late this year so the current machine remains in use at this time

Next to X-Ray, this room is currently used for health education activities. Adjacent to this is a restroom and the last room on the right is a lunchroom.

Across the hallway is a utility room, another office/exam room, and at the end of the hallway a testing room.

This facility was a little crowded, did everyone get a chance to see what you were interested in?

That concludes the tour of the 200 West Health Care center. If anyone should need to use the restrooms, now would be a good time and we will reboard the bus for return to Richland.

Board the busses. Cross check list of names. Ensure everyone has their badge.

Return to Richland Federal Building

Thanks everyone for a wonderful tour. If you have any comments please provide your 3x5 cards or follow the submission guidance on the website.

I will be collecting your visitor badges at this time.

Thank you and have a safe trip home.
